New York, May, 1879.

NEW YORK, MAY, 1879.

DEAR SIR:

We have the pleasure to hand you herewith our Drug List, with prices corrected to date. Our friends will please remember that these quotations refer to moderate quantities; for large quantities and especially for full packages, more favorable prices may generally be expected.

Our terms are Cash, in 30 days. Bills not paid at maturity will be subject to draft.

Parties ordering for the first time will see the necessity of **giving references, or of enclosing Draft to cover.**

As we have numerous requests to forward small articles by mail, we would inform our friends that **no liquids, powders, nor any articles enclosed in glass can be sent by mail.**

All packages sent or received at the New York P. O. are opened, and if there be anything contained which is at variance with the law, letter postage on the package is rigidly exacted.

Any writing upon packages of Merchandise, other than the mailing directions, subjects the package to letter postage.

**All responsibility for any damage, or loss of goods that may be sent by mail, must be assumed by the purchaser.**

Pledging our best endeavors in behalf of our friends, and soliciting the commands of those in the trade with whom we have not hitherto had the pleasure of any correspondence.

We remain, faithfully yours,

LAZELL, MARSH & GARDINER.

## SELECT POWDERS.

These Powders are not merely absolutely pure, but made from *choice* drugs, and the most judicious and intelligent care exercised in their manipulation. For thirty years they have received the approbation of the trade throughout the country.

We call attention to the list of *Powdered Extracts* prepared by ourselves, and which are specially adapted for Prescription uses. We guarantee them to contain the active principles of the Drug, uninjured by heat, and to be equal, grain for grain, to the Solid Extracts. We furnish them in one ounce bottles only.

NOTE.—The Powdered German Narcotic Extracts sold in this market are only one-half strength.

Put up in tin cans of 5 lbs. and 10 lbs. each. Also in 1 lb.,  $\frac{1}{2}$  lb.,  $\frac{1}{4}$  lb.,  $\frac{1}{8}$  lb., and 1-16 lb. bottles, enclosed in paper cartons.

The packages enumerated above will be charged as follows.

10 lb. tin cans	each	\$0 45	$\frac{1}{2}$ lb. bottles, with cartons	each	\$0 15
5 lb.		0 30	$\frac{1}{4}$ lb.		0 12
1 lb. bottles, with cartons		0 25	1-16 lb.		0 10
$\frac{1}{2}$ lb.		0 20			

When desired the Powders will be put up in paper bundles.

## STANDARD FLUID EXTRACTS;

MANUFACTURED BY

LAZELL, MARSH &amp; GARDINER.

These Fluid Extracts are prepared by the process of "Repercolation," in which only that portion of a percolate is reserved and sold as Fluid Extract, which corresponds with a known accurate standard. This standard is made by assay of the drug, exhausting sixteen troy ounces with a suitable menstruum and determining the amount of Extractive matter which it yields. This method obviates the use of heat, vacuum pan, or hydraulic press. The finest dusted powders are used, prepared from drugs which have been selected for their reliable quality and full medicinal activity.

No process insures that perfect exhaustion of material, combined with stability of finished product, so well, as that known as "Repercolation."

The strength of these Extracts (with a single exception) is one troy ounce of crude material to one ounce of fluid extract, which gives one grain to each minim—the dose can therefore be calculated with certainty.

The exception is Opium, which is identical with the *Tinctura Opii Deodorata* of the U. S. P., containing 37½ grains of powdered Opium in each fluid ounce.

We invite attention to the new style of putting up these goods. Our new labels have printed on them, doses and formulæ for preparing Tinctures, Syrups, &c.

## SUGAR-COATED PILLS &amp; GRANULES,

MANUFACTURED BY

BULLOCK &amp; CRENSHAW, Philadelphia.

These Pills have now been before the profession for more than fourteen years. From the first, conscientious care has been observed with regard to the quality of the medicines entering into them, and to the accuracy and completeness with which they have been combined and divided. Experience and skill have been eagerly availed of to bring them, day by day, a step nearer perfection, and it is believed that the Pills of this house are equalled by no other products of the same kind, and that they excel all others in their ready solubility; any one who will cut open one of their Quinine Pills will need no further proof that perfection has been attained in this all important point.

We have been induced to urge the sale of these Pills by the feeling of satisfaction resulting from the accuracy, care, reliability and skill of the manufacturers.

## PHARMACEUTICAL PREPARATIONS,

MANUFACTURED BY

JOHN WYETH &amp; BRO., Philadelphia.

In addition to our regular price list, we ask attention to the accompanying one of Messrs John Wyeth & Bro. of Philadelphia. We have sold their preparations largely for years, and the increased demand and many inquiries, necessitates our issuing a special list. The high reputation enjoyed by the Manufacturers is a guarantee that the articles prepared by them will be found as represented. "Compressed Pills" are a comparatively recent addition to their list, and present such decided advantages over coated pills by reason of their smaller size, flattened shape, and greater solubility, that they deserve your consideration. All their preparations will be supplied at the Manufacturer's lowest prices.

Physicians will find this mode of administering many medicines and the natural waters, such as Vichy, Kissingen, etc., preferable to any other. Physicians and druggists will find Alfred Bishop's superior to any other make, and always just as represented.

## COMPRESSED PILLS.

The preparation of drugs in such a form as to be at once efficient and readily administered, is a matter of the utmost importance, alike to physician and patient. In this respect great advantages have been made of late years, but we can confidently claim that our Compressed Pills are far superior to any of the other improved medicaments hitherto introduced.

These "Compressed Pills," made by dry compression, are free from the coatings that render many other Pills objectionable.

They are readily soluble or diffusible, and, being flat in shape, are more easily swallowed than those of any other form.

Owing to the absence of the excipients ordinarily employed in making Pills, they are smaller than those made by any other process.

They are smooth, glossy, and elegant in appearance, and are made of the purest materials.

Leading physicians have found these "Compressed Pills" to be reliable and quick in their action.

Bisulphate of Quinine being a more soluble salt than the ordinary sulphate, we recommend its use in preference to the other. When given in the form of a "Compressed Pill," it will act as promptly as a solution of ordinary Quinine.

When the Compressed Pills weigh more than the given formula, it is owing to the addition of Sugar of Milk, which is used in order to divide the drugs more completely, thereby increasing their diffusibility.

Books containing formulas of all our preparations will be forwarded to any physician or pharmacist who may desire them.

## FIVE AWARDS FROM THE

## UNITED STATES CENTENNIAL COMMISSION.

### FOR PHARMACEUTICAL PREPARATIONS.

Embracing ELIXIRS, SYRUPS, MEDICATED WINES, Saccharated Pepsin, etc., etc. "These Elixirs, etc., etc., seem to be a REAL ADVANCE in Pharmacy, as they represent strength and virtues with comparatively much less disagreeable taste than the same ingredients, as usually made and extemporaneously prepared."

### FOR COMPRESSED PILLS.

"In our judgment, these Compressed Pills are, for above reasons, viz.: smaller size, absence of excipients and speedy solubility, superior to any other pills manufactured."

### FOR PAPOMA (Food for Infants and Invalids).

"The most nutritious, most easily digested and most strengthening food, etc."

### FOR SUPPOSITORIES.

"For precision in admixture of drug, regularity in size of cone, and skill in incorporating the various ingredients, is worthy of special mention."

Two awards were also given to the manufacturers of the preparations for which they have the sole agency, and have met with such deserved favor from physicians, viz.: to Marvin Bros. & Bartlett, for their Pure Medicinal Cod Liver Oil. "For Freedom from disagreeable taste and color, careful preparation, and representing in every respect the elements required in Cod Liver Oil."

TO ED. LOEFLUND, STUTTGART, GERMANY, FOR HIS CONCENTRATED EXTRACT OF MALT.

"Its great richness in Sugar of Malt, complete absence of drugs and products of fermentation, such as alcohol and carbonic acid, and agreeable and pleasant taste."

## FRESH HUMANIZED AND BOVINE VACCINE

The sale of these extracts is steadily increasing. They are put up in handsome styles of uniform strength and great delicacy of odor, and are considered by many to be the best goods in the American market. We specially recommend the "Two ounce" size as being most desirable for retailing, the present ruinous competition in "imported" goods leaving no profit to the retailer.

**Eeckelaers' Toilet Soaps.**

We would call the attention of druggists and of dealers in Toilet articles to the following line of Soaps, manufactured by L. EECKELAERS, of Brussels. We confidently recommend them as being UNRIVALED both in QUALITY and PERFUME, by any soaps now offered, either of home or foreign manufacture. Each kind is put up separately in boxes of  $\frac{1}{2}$  doz. each.

# PURE COD LIVER OIL.

MANUFACTURED ON THE SEA-SHORE BY US FROM FRESH AND SELECTED LIVERS

This Oil is made from fresh selected livers on the sea-coast, and from the great care and skill attending its manufacture, is perfectly pure and sweet, and can be retained by the stomach when all other kinds have failed.

It is confidently recommended to the medical profession as the sweetest and purest in market.

Prof. Parker, of New York, says; "I have tried almost every other manufacturer's Oil, and give yours the decided preference."

Prof. Hayes, State Assayer of Massachusetts, after a full analysis of it, says: "It is the best for foreign or domestic use."

It is made with GREATER CARE, is sweeter, and has less of the RANCID, unpleasant fish taste and odor than any other made—foreign or domestic.

**Iodo-Ferrated Cod Liver Oil.**—A combination of Cod Liver Oil with Iodide of Iron.

**Cod Liver Oil with Phosphate of Lime.**

**Cod Liver Oil with Hypophosphites of Lime and Soda.**

## THE BEST TONIC.

**Ferro-Phosphorated Elixir of Calisaya Bark** (Calisaya Bark and Pyrophosphate of Iron)—A pleasant straw-colored cordial (never before attained), made directly from the best Calisaya Bark (not from its alkaloids or their salts,) combining the three most valuable tonics, Iron, Phosphorus and Calisaya, without injury to their active tonic properties, in an agreeable elixir, pleasant to the taste and acceptable to the most delicate stomach. Each tea-spoonful contains one grain of Pyrophosphate of Iron, and each pint the virtues of one ounce of Royal Calisaya Bark.

**Ferro-Phosphorated Elixir of Calisaya with Bismuth.**

**Ferro-Phosphorated Elixir of Calisaya with Strychnia.**

**Elixir-Phosphate Iron, Quinine and Strychnine.**

**Ferro-Phosphorated Elixir of Gentian.**

**Elixir Pepsin, Bismuth and Strychnine.**

**Elixir of Paullinia.**

**Elixir Taraxacum Comp.**

**Juniper Tar Soap.**—The JUNIPER TAR SOAP has been extensively used for a long time, with the greatest success, in Psora, Lichen agrius, Impetigo, Ring-worm, the different scaly affections of the skin, the advance stage of Eczema and Favus, and especially for chapped hands, face, and all roughness of the skin caused by cold weather, or change of temperature.

**Ferro-Phosphorated Wine of Wild Cherry Bark.**—Each Fluid Drachm contains twenty-five grains of the Bark and two grains Ferri-Pyrophosphate.

## MENSMAN'S PEPTONIZED BEEF TONIC.

We call attention to this preparation, containing the *entire nutritious properties* of the muscular fibre, blood, bone, and brain of a healthy bullock, dissolved by aid of heat and pepsin, and preserved by spirit. It is not a mere stimulant, like the now fashionable extracts of beef, but contains blood-making force-generating and life-sustaining properties, calculated to support the system under the exhausting and wasting process of fevers and other acute diseases, and to rebuild and recruit the tissues and forces. It is friendly and helpful to the most delicate stomach, and where there is a fair remnant to build on, will reconstruct the most shattered and enfeebled constitution. It is entirely free from any drugs. Dispensed in 12 and 16 oz. bottles

ANALYSIS OF BELLADONNA PLASTER BY PROF. R. O. DOREMUS.

BELLEVUE HOSPITAL MEDICAL COLLEGE,  
NEW YORK, Sept. 7, 1878.

Gentlemen—I obtained from Messrs. W. H. Schieffelin & Co., of this city, samples of Belladonna Plasters, prepared by Grosvenor & Richards, Boston; Mitchell Novelty Plaster Works, Seabury & Johnson, New York and London. I have examined these varieties for the purpose of determining which possesses the largest quantity of Atropine. I employed equal surfaces of each, and *my analysis demonstrated that Seabury & Johnson's contains the greatest proportion of the active principle of Belladonna, and is the most reliable Plaster.*

R. OGDEN DOREMUS, M. D., LL.D.

*Worthy of Consideration before Ordering Porous, Medicinal or Surgical Plasters.*

Our unceasing efforts have been devoted entirely to our special branch of pharmaceutical chemistry; that we are thoroughly absorbed in our work is demonstrated by the many new improvements we have developed and perfected, and the high standard of quality our manufactures have attained. It has been our sole aim and ambition to give to Medical practitioners and Pharmacists thoroughly reliable goods; that we have been eminently successful is clearly shown through the acts of our competitors, who have not only imitated our symbols and styles, but have actually simulated our trade marks. We guarantee our manufactures to be invariably of first quality, at reasonable rates, skillfully and carefully prepared.

Very truly yours,

# HUSBAND'S CALCINED MAGNESIA!

---

MEDAL AWARDED AT WORLDS FAIR, NEW YORK, 1853.

---

FIRST PREMIUM SILVER MEDAL awarded by the Franklin Institute, Philadelphia; by the Mechanics' Association, Boston; by the American Institute, New York, and by the Maryland Institute. In the report of the Twentieth Exhibition of American Manufacturers, by the Franklin Institute, Pa., it is stated that

## HUSBAND'S MAGNESIA

*Is "Believed to be the best in the United States."*

Its superior qualities consist in its being entirely deprived of carbonic acid; in its freedom from unpleasant taste, smell or other disagreeable property, and without roughness or grittiness to the touch or palate. One teaspoonful of it is equal in strength to three or four teaspoonfuls of the common Calcined Magnesia—thus combining smallness of dose with the most agreeable form in which Magnesia can be administered.

## ISINGLASS ADHESIVE PLASTER.

This PLASTER has been found to be admirably adapted to Strapping after Surgical operations, and as a dressing to either incised or lacerated wounds. It is clean, of easy application, adheres firmly WITHOUT PRODUCING INFLAMMATION, and being semi-transparent, allows of an examination of the parts without their having to be disturbed by its removal, until, in many instances, the cure is affected. This plaster is not affected by age, and will bear exposure to any climate.  For sale by Druggists, and by

# THE DRUGGISTS CIRCULAR

AND

## CHEMICAL GAZETTE.

THIS PHARMACEUTICAL MONTHLY has now been published for twenty-two years. It contains, in large quarto form, 42 pages, filled with interesting Pharmaceutical and general Scientific matter of a practical character; a full and correct PRICE-CURRENT, and a large variety of advertisements, that to apothecaries, are of first-rate business value.

The many years it has existed, and the fidelity with which it has been conducted in the interests of Pharmacy, have naturally secured for it a general circulation much larger than that of any similar periodical in this country, or perhaps in any other. Our monthly edition is now considerably above 10,000 copies.

*SUBSCRIPTION PRICE is \$1.60 a year, free of Postage: Payment required in advance.*

We submit a few extracts from letters received from subscribers, picked indifferently from a large mass of similar communications:

"The CIRCULAR is our stand-by. We try other journals, but generally discontinue them after one year's subscription expires. The CIRCULAR we have taken and expect to take as long as we remain in the business."

A. E. ANGLIER, Columbus, O.

"I find it is not possible to get along without the DRUGGISTS CIRCULAR."

J. MILTON BREWER, Norwich, Conn.

"The CIRCULAR is the best and cheapest paper a druggist can read, as there is so much valuable information in it. I would not like to be without it."

H. A. GOODWIN, M. D., Detroit, Mich.

"I am well pleased with the CIRCULAR; would not do without it for \$25 per year."

J. M. DIXON, Titusville, Fla.

"I am very much pleased with the CIRCULAR. A year ago I took six Pharmaceutical papers, but have discontinued five of them. I could not give up the CIRCULAR, however, for it is well worth the price."

FRANK S. DEWEY, Jr., Westfield, Mass.

"I find the CIRCULAR almost indispensable for reference. I have subscribed to a great many others, but take now only your DRUGGISTS CIRCULAR; this I keep, it being the best of them all."

FRED. LAUTENBACH, Baltimore, Md.

"I consider the DRUGGISTS CIRCULAR the best paper published for our business."

GEO. BOEMLER, Galesburg, Ill.

"The DRUGGISTS CIRCULAR is the best periodical for druggists with which I am acquainted."

E. D. BRYANT, Circleville, O.

"I think the CIRCULAR is the best magazine out for druggists' use."

C. E. AMANN, Portsmouth, O.

"We find that year after year the CIRCULAR grows better and better."

WINSLOW & ALLBRIGHT, Hutchinson, Kas.

"The CIRCULAR is about the most welcome visitor I have. Wishing you the abundant success which you so richly deserve, I am, etc."

W. A. STROTHER, Lynchburg, Va.

"It is seldom that a day passes but I have to turn to the DRUGGISTS CIRCULAR as a book of reference and of authority."

CHAS. H. A. STAFFORD, Middlebury, Vt.

"Your CIRCULAR is invaluable. I would not be without it for five times the subscription price."

NORMAN I. BRUNNER, Macon, Ga.

"The DRUGGISTS CIRCULAR comes as regularly as the 4th of July, and is always welcomed beyond any periodical of its professed kind."

CHAS. W. DRAKE, Middleboro, Mass.

"In my opinion you are keeping the CIRCULAR ahead of all competitors."

A. WALKER, Freehold, N. J.

"Your valuable CIRCULAR is as necessary to every druggist as the pestle and mortar."

J. P. PERCIVAL, Boston, Mass.

"I have taken the DRUGGISTS CIRCULAR four years, and the first copy of the fifth year received a more cordial welcome than the first copy of my first year. May it continue to prosper."

WM. BROWN, Cohoes, N. Y.

"I cannot get along without the DRUGGISTS CIRCULAR. It is without exception the best paper for the Pharmacist that I have ever seen, and I always intend to be a subscriber as long as I am in the business. I consider it necessary to my success as a Druggist."

EDWARD C. JACKSON, Norfolk, Va.

"We cannot afford to do without the DRUGGISTS CIRCULAR."

MERTZ & HALE, Sedalia, Mo.

"I have been a subscriber to the CIRCULAR many years and find it to be one of the most valuable papers for the druggist."

G. TIELKE, Cleveland, O.

"The CIRCULAR is as necessary as bread."

A. E. MAGOFFIN, Humboldt, Kas.

"I cannot do without the CIRCULAR. To every live druggist it is second only to the Dispensatory. I look forward with anxiety at the close of each month for a new number."

A. F. PEELER, Woodlawn, Ill.

"We cannot spare the CIRCULAR from our business, it being as indispensable to the profession as the Dispensatory."

C. A. GIVENS & CO., Girard, Kas.

"I cannot get along without the CIRCULAR."

JAS. L. SWINGLE, Mt. Gilead, O.

"Each copy of the CIRCULAR is worth its weight in gold."

D. C. SMITH, Fishkill Village, N. Y.

"The CIRCULAR has come to us regularly since its first issue, and has always been a welcome visitor. With the wish that you may largely increase its circulation the current year, we remain, &c."

ISAAC J. MARTIN & SON, Ellicott City, Md.

"This, I think, makes the twenty-first subscription I have paid, and I do not begrudge it, as I consider the CIRCULAR one of the best, if not the best of my list of medical journals."

L. D. CYR, M. D., Negaunee, Mich.

"The arrival of the CIRCULAR each month is a pleasure to me, and I throw all other papers aside to read it. The only fault I find with it is it does not come often enough."

HERMAN H. SIKKEMA, Butler Centre, Iowa.

"I find I cannot get along without the CIRCULAR."

W. F. CRAWFORD, Newberry, Pa.

"I don't consider myself an expert, but prefer your paper to any I have seen."

J. W. BROWNING, Windsor Locks, Conn.

"I cannot afford to do without the CIRCULAR. The profits on a single recipe obtained from its columns last year will pay the subscription price many times over. You have my best wishes for your continued success."

O. M. JEFFERDS, East Randolph, N. Y.

# COLLEGE OF PHARMACY

OF THE  
CITY OF NEW YORK.

## FIFTIETH ANNUAL SESSION, 1879-'80.

The Lectures in this College will commence September 22, 1879, and continue until March 6th, 1880. The Lectures on Botany and Materia Medica will be illustrated by living plants, diagrams and models, while the drugs themselves will be shown as they are found in ordinary course of business, and their medical action explained. The Lectures on Chemistry, will give the student a thorough insight into this important department, and will be finely illustrated with practical experiments designed to impress upon the mind the facts which are conveyed in the Lectures. The important branch of Toxicology, will receive special attention. The Lectures on Pharmacy will be practical, and all important processes will be fully detailed, explained and illustrated. The selection of drugs and their proper manipulation to produce the remedies ordered by the U. S. Pharmacopoeia and other recognized standard works will be dwelt upon, and the application of Analysis to Pharmaceutical Chemicals will be shown. The various manipulations of Pharmacy, as well of the store as of the Laboratory, will be explained, and a large number of preparations will be made, in order to familiarize the students with their manufacture.

The present session will continue the plan of dividing the classes into a Junior and Senior class who received instruction on a graded basis, and at separate hours. The Junior class will attend on Tuesday and Thursday evenings and Saturday afternoons; and the Senior class on Monday, Wednesday and Friday evenings.

The building recently purchased for the College has been remodeled and adapted specially for the comfort and convenience of the College and its classes, and has been newly fitted with apparatus, models, specimens and aids to the lectures.

TERMS, for the Course, \$36. Matriculation Ticket, \$2.

From the President of the American Society for the Prevention of Cruelty to Animals.

HEADQUARTERS OF THE SOCIETY,

FOURTH AVE., COR 22D ST.,

NEW YORK, March 4th, 1879. }

Messrs. SAMUEL GERRY & CO.:

A lotion ("SAPANULE,") manufactured by you has been given to me for the purpose of testing its curative effects on mankind and animals.

I have not yet had occasion to apply it to the latter, but I have done so to myself and have received immediate relief.

Being an animal myself, I have every reason to believe that brute creatures would experience similar benefit from its use.

This Society will so employ it whenever the necessity shall present itself, and in the meantime I commend it to the patronage of all having need of relief from suffering.

HENRY BERGH, President.

"SAPANULE" is a preparation of "STERLING MERIT."

Put up in pint and quart bottles, retailing at 50c. and \$1.00,

All druggists should keep it and recommend it to customers.

For Dyspepsia,

MENTAL AND

Physical Exhaustion,

Nervousness,

DIMINISHED VITALITY,

Urinary Difficulties,  
etc., etc.

Prepared according to the directions of E. N. Horsford, late Professor in Harvard University.

So far as experience goes, it seems to act as if it were nutriment to the cerebral and nervous systems, restoring to their normal action secretory organs that have been deranged, giving vigor where there has been debility, and renewed strength where there has been exhaustion.

There seems to be no difference of opinion in high medical authority, of the value of Phosphoric Acid, and no preparation has ever been offered to the public which seems to so happily meet the general want as this.

It is not nauseous, but agreeable to the taste.

No danger can attend its use.

Its action will harmonize with such stimulants as are necessary to take.

It makes a delicious drink with water and sugar only.

*From FRANCIS H. ATKINS, A. A. Surgeon, U. S. Army.*

FORT GIBSON, IND. TER., FEB. 1, 1879.

PROF. E. N. HORSFORD:

Dear Sir—The Acid Phosphate medicinal preparation I have used quite extensively since 1870, and with great satisfaction. Have half a dozen patients using it here now—citizens, as well as persons connected with the service—I have yet to meet a case, where being judiciously prescribed by a physician, it has failed to afford relief, and no other remedy have I seen people so generally hand about among their friends with commendation.. For dyspepsia, whether in the lean or corpulent, in nervous debility, and in night sweats of consumption, it has commonly given speedy benefit, and some of my army friends are quite enthusiastic about it."

Prices reasonable. Pamphlets giving further particulars mailed free on application to manufacturers.

Physicians desiring to test it will be furnished a bottle free of expense, except express charges.

# IMPROVED PHARMACEUTICAL STILL.

PATENTED MARCH, 1876.

PRENTISS'  
ALCOHOL RECLAIMER,  
AND  
Extract Apparatus.

This very popular apparatus is specially adapted to the wants of the Retail Druggist—occupying but little space, and is quickly set up, works rapidly, and is free from danger.

**Construction.**—A boiler, marked A, with a circular opening at the top. 2d, a tubular column B, soldered to a circular plate which is screwed into a fitting in the opening of the boiler, and has a removable screw cap on its upper end. 3d, a connecting pipe C. 4th, a condenser, D, with an inlet of water at E, and an outflow of water at F. A spout, G, for outflow of distilled. 5th, the diaphragms 1, 2 and 3. In fig. 2, the set of diaphragms, No. 1, is shown in place in the column.

**Special Advantages, 1.**—The entire apparatus is made of the best tinned copper with brass fittings. Being made with screw joints prevents the escape of vapor, and renders packing and luting unnecessary.

2d, The diaphragms atomize the vapors, and in reclaiming alcohol greatly facilitates the raising of the degree of strength to a proper standard.

3d, The worm being flat, only a few inches long, and perfectly smooth inside, is *very easily cleaned*, besides it has very much more condensing power than any other worm, and requires less than half the amount of water.

For the recovery of alcohol or ether, the making of medicated waters from the drug, or the distillation of water for dispensing purposes, it has no equal.

An ordinary gas or oil stove furnishes all the heat required.

Full directions with each still.

It is made in three sizes, No. 1, Boiler capacity 133-100 gallons, \$16.00

## SACCHARATED PEPSIN.

We were among the first to manufacture this preparation on a large scale and our product has been received with great favor by the trade during the past four years.

We have now perfected a "new process" for its manufacture, whereby we obtain a Pepsin free from animal odor, mucus, and inorganic salts, and we claim that for perfect solubility and standard digestive power, our Saccharated Pepsin cannot be excelled.

When desired in a fluid form, the following is suggested:

Saccharated Pepsin, 64 grains; Water, 5 fluid ounces; Muratic Acid, 1 fluid drachm.

Dissolve, filter, and add Glycerine, 3 fluid ounces. As Alcohol injures the properties of Pepsin, Elixirs or preparations containing alcohol are not reliable forms of administering this remedy.

NOTE—Pepsin, when first adopted by the Profession, was used in doses of from one to five grains. From five to thirty grains are now given with most satisfactory results.

In 1 pound bottles, - - - - - \$5.50 per pound.

## OLIVE OIL SOAP.

This Soap is made of fine Olive Oil, near ancient Haifa, at the foot of Mount Carmel, Syria. It is cold pressed in elegant cakes of six ounces, and will not shrink. It is without adulteration, and so sweet that few things are more agreeable for a TOOTH WASH.

### FOR THE NURSERY IT HAS NO RIVAL.

'The saponification of Olive Oil with the alkalies results in the production of what has long been known as **Castile Soap**. This is a very desirable variety of Soap for family use, but of late it has been so extensively falsified by manufacturers that it has been difficult to obtain it pure. Under the name of '**Savon du Carmel**,' a **Mission Society of Palestine** have prepared a pure Soap from pure Olive Oil. It is something new to be supplied with Olive Soap from the oldest olive-growing country in the world, and also from the land of the ancient Hebrews. It must have a large sale.'—

Principal Factories—*Redditch, Worcestershire, England.*

Certain parties in this country and abroad, having endeavored to appropriate to their own use the reputation which we have built up by many years of industry and the outlay of much capital, we are obliged to warn our friends of what has been and is being done to the injury of our trade and their interests. Hooks are being made of sizes below our standards. The steel is poorly tempered and miserably japped. The wire is smaller than that regularly used heretofore by all reputable makers. Frequently the boxes do not contain the quantities specified on the labels. Lines are not of the length for which they are sold, and are made of material that is not fit for such manufactures. If the trade would only take the trouble to test the hooks with a wire gauge, and compare the size with our standard samples, and if they would measure the length and try the strength of lines offered them, they would not then be misled. But, unfortunately, they seldom notice these discrepancies until the goods are returned to them by their customers, when difficulties and unpleasantness are apt to ensue. This sort of competition is very difficult to deal with. We have recently discovered that our style of boxing and packing is being so closely imitated as to render the detection of the fraud almost impossible. Even our labels are being used. We learn also that a foreign manufacturer is largely interested in this unworthy scheme to undermine our trade in this country. In order, therefore, to protect ourselves and the public we have devised and registered a trade mark, a copy of which will be found herewith. Any infringements of the rights secured to us by this trade mark will be dealt with to the full extent of the law.

The trade will oblige us by examining every box and label in order to see whether it has our trade mark upon it; and we shall esteem it a special favor if our customers will notify us of any attempt to represent goods without our trade mark as being made by us.

## ANHYDROUS LARD.

The most perfect BASE as yet discovered for Ointments, Pomades, etc. This Lard is absolutely pure, it contains no water and no impure matter of any nature whatsoever, and will keep in any climate without becoming rancid. It is of a firm, solid consistency, and well adapted to the uses of the Druggist and Physician, who are invited to examine it.

The following letter is from a practical chemist who has tried it :

MR. F. K. EDWARDS—Dear Sir:—Having occasion to prepare a considerable quantity of Ointment in which a Salt of Lead is added to the melted Lard at an elevated temperature, I obtained a perfectly smooth unguent without any chemical change. This satisfied me the Lard was anhydrous, for, as all chemists know, if water had been present even in small quantities, a reaction between the fatty acids and the lead, and consequent liberation of glycerine (or in other words, saponification,) would have been the result.

Very truly,

## **Laboratory Products.**

---

The attention of Pharmacists is called to the following important PHARMACEUTICAL PRODUCTS, which are but a few of the many articles made in our laboratory, all of which are of unexceptionable quality.

### **Medicinal Fluid Extracts**

of which our list embraces about one hundred and fifty kinds.

These are all made by COLD PERCOLATION, and, UNLIKE many of the kinds offered for sale, are RELIABLE and of full standard strength. With one exception, each fluid ounce contains all the medicinal virtues of one troy ounce of the drug from which it is made.

### **Citrate of Iron and Quiniae**

containing over Ten per cent. of the Alkaloid Quiniae AND PERFECTLY SOLUBLE in cold water. Much of this preparation offered for sale is deficient in Quiniae strength.

### **Saccharated Pepsin.**

We have for the past five years been manufacturers of this article, and it has always been known favorably as being entirely soluble, of full strength and acceptable quality.

A full special list of all our Pharmaceutical and Chemical products will be furnished on application.

## POWDERED MEDICINAL EXTRACTS

The attention of pharmacists is respectfully called to the following in relation to an improvement in preparing medicinal extracts, so that they may be readily dispensed without loss, change or inconvenience. This is readily accomplished in the *Powdered Medicinal Extracts* which are of the same medicinal strength as the solid extracts prepared in our own Laboratory, and both of these varieties are superior to similar preparations usually offered for sale.

For convenience, these Powdered Extracts meet the wants of the dispensing pharmacist, and for their reliability and medicinal action they have received the unqualified approval of those physicians who have employed them.

Our powdered extracts may in all cases be substituted in *equal weight* for the *Solid Medicinal Extracts*.

Put up in one ounce bottles bearing labels like the following:

## POWD. EXT. HYOSCYAMUS.

*One grain of the powdered extract represents three and three-fourths grains of powdered Henbane Leaf.*

This is prepared from the official Alcoholic Extract of Henbane, and has the same medicinal strength.

NO. 10 GOLD STREET, N.Y.

The popular notion that this substance is a combination of ingredients, is an error.

GENUINE PERSIAN INSECT POWDER is the flowers (ground) of the *Pyrethrum Carneum* or *Pyrethrum Roseum*, a plant growing at a high elevation upon the Caucasian Mountains, and possessing in a singular degree, the quality of first stupefying and then killing insects and vermin of every kind, while at the same time it is harmless to man and animals.

PERSIAN INSECT POWDER has long been in extensive use in Asia and Eastern Europe, but only within a comparatively recent period has it been known in Western Europe or in this country.

Our House was one of the first (if not the first) to introduce it in the United States. As its qualities became known, a large demand quickly sprang up, stimulated by parties who adopted the article, putting it up, however under other names, such as "Magnetic Powder," "Electric Powder," &c.

The demand for the powder in Western Europe and this country has increased so much of late, that adulterations with the leaves and stems of the plant, as well as with other substances, have become common, and vast quantities of this trash are thrown upon the market.

Indisputably many persons on this account have been disappointed in the results they expected.

We have, since its first introduction in this country, been largely engaged in importing the Persian Insect Powder, and our long experience has given us unsurpassed facilities for commanding the best Powder obtainable, viz: *that ground from the flowers alone*. Our instructions to our agents are imperative on this point; and that they have been faithfully followed, is evidenced by the favor with which PERSIAN INSECT POWDER, bearing our label has always been received.

For Terms, see below.

The most satisfactory results in the use of the Persian Insect Powder, are secured by the use of a Bellows, made for the purpose. The Bellows, filling the air with the powder, compels the inhalation of the fine particles by the insect or vermin, and it is this inhalation, rather than mere contact, that kills them. By it, the Powder can be blown into crevices and recesses, searching out such vermin as would be comparatively secure from a simple strewing by hand. Moreover, the use of the Bellows economises the Powder, making every particle tell.

# POWDERED MEDICINAL EXTRACTS

The popularity of Fluid Extracts among medical men, as well as in general use, is due in part to the fact that when properly manufactured, the finished product represents in *one minim*, the medicinal activity of *one grain* of the drug used.

The official **Solid Extracts** have never been made to conform to any similar standard, and by the loose method pursued by some in their manufacture, they have proved quite variable in their medicinal activity.

To place our **Powdered Medicinal Extracts** on a more scientific basis, and to insure more satisfactory use of the same, we now state on the label of each bottle, the *exact amount of crude drug* which *each grain of Powdered Medicinal Extract* represents, and this invariably corresponds with the medicinal activity of the Official Standard of the U. S. Pharmacopœia.

Our **Powdered Medicinal Extracts** will stand any normal degree of heat unchanged and unimpaired, but they have a tendency to absorb moisture from the atmosphere in hot, damp weather, if the bottles are loosely corked, and this cannot be avoided without a change in manufacture, which *would destroy their reliability* as medicinal remedies.

In this respect our **Powdered Medicinal Extracts** differ from many others, which claim the merit of withstanding such changes, but do this at the expense of medicinal activity.

If the bottles are *kept well corked*, the risk of their cohering into a solid mass is greatly lessened.

We ask for our **Powdered Medicinal Extracts** a trial, feeling assured they will meet the entire desire of both Physician and Pharmacist.

We commend them specially to those Pharmacists who prepare Compressed Pills and Suppositories as being of superior advantage to the use of Solid Extracts.
